

Genes4Life PERFECT MATCH & COMPLETE

The complete test of compability
for future parents and donors

**Amplexa
Genetics®**

You are ready to become a responsible mother or father, either alone or with someone else.

Do you need help finding the perfect donor?

Genes4Life is a test performed on future parents and their donor in search of the **PERFECT MATCH**.

Some rare diseases may be passed on to a child, if a parent and donor have a genetic mutation in the same gene.

It is a **PERFECT MATCH**, when the donor and future parent are compatible, because both are free of genetic mutations that may cause rare inherited diseases.

We help you select the right donor in 3 simple steps

1.
You select a donor.

2.
Using a saliva or blood sample, Amplexa Genetics performs the Genes4Life test on you and you donor.

3.
We deliver your result within four weeks.

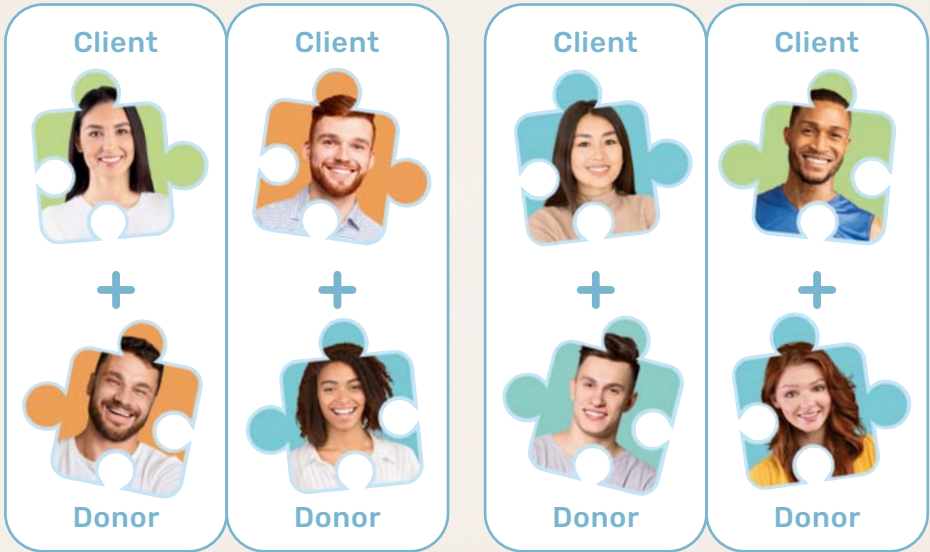

Genes4Life
FIND THE PERFECT MATCH

Genes4Lifes is the most **COMPLETE** test. We screen for genetic mutations in more than 400 genes related to rare diseases.

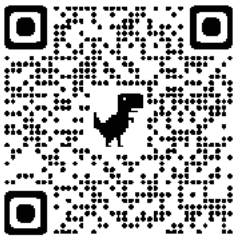

Genes4Life

Delivers two types of results

It's a match

It's not a match

If your result is not a match, repeat steps 1,2, and 3 and find your perfect match
